Core Research Team
November 2018

Buyer Persona

Mick

Manager in IT or OPS

~~Business Excellence Manager in large n
organisation (May be healthcare org)~~

~~with >500 employees in Ireland~~

~~The problem is big enough for them to p
solution~~

~~Company may be suffering from attrition~~

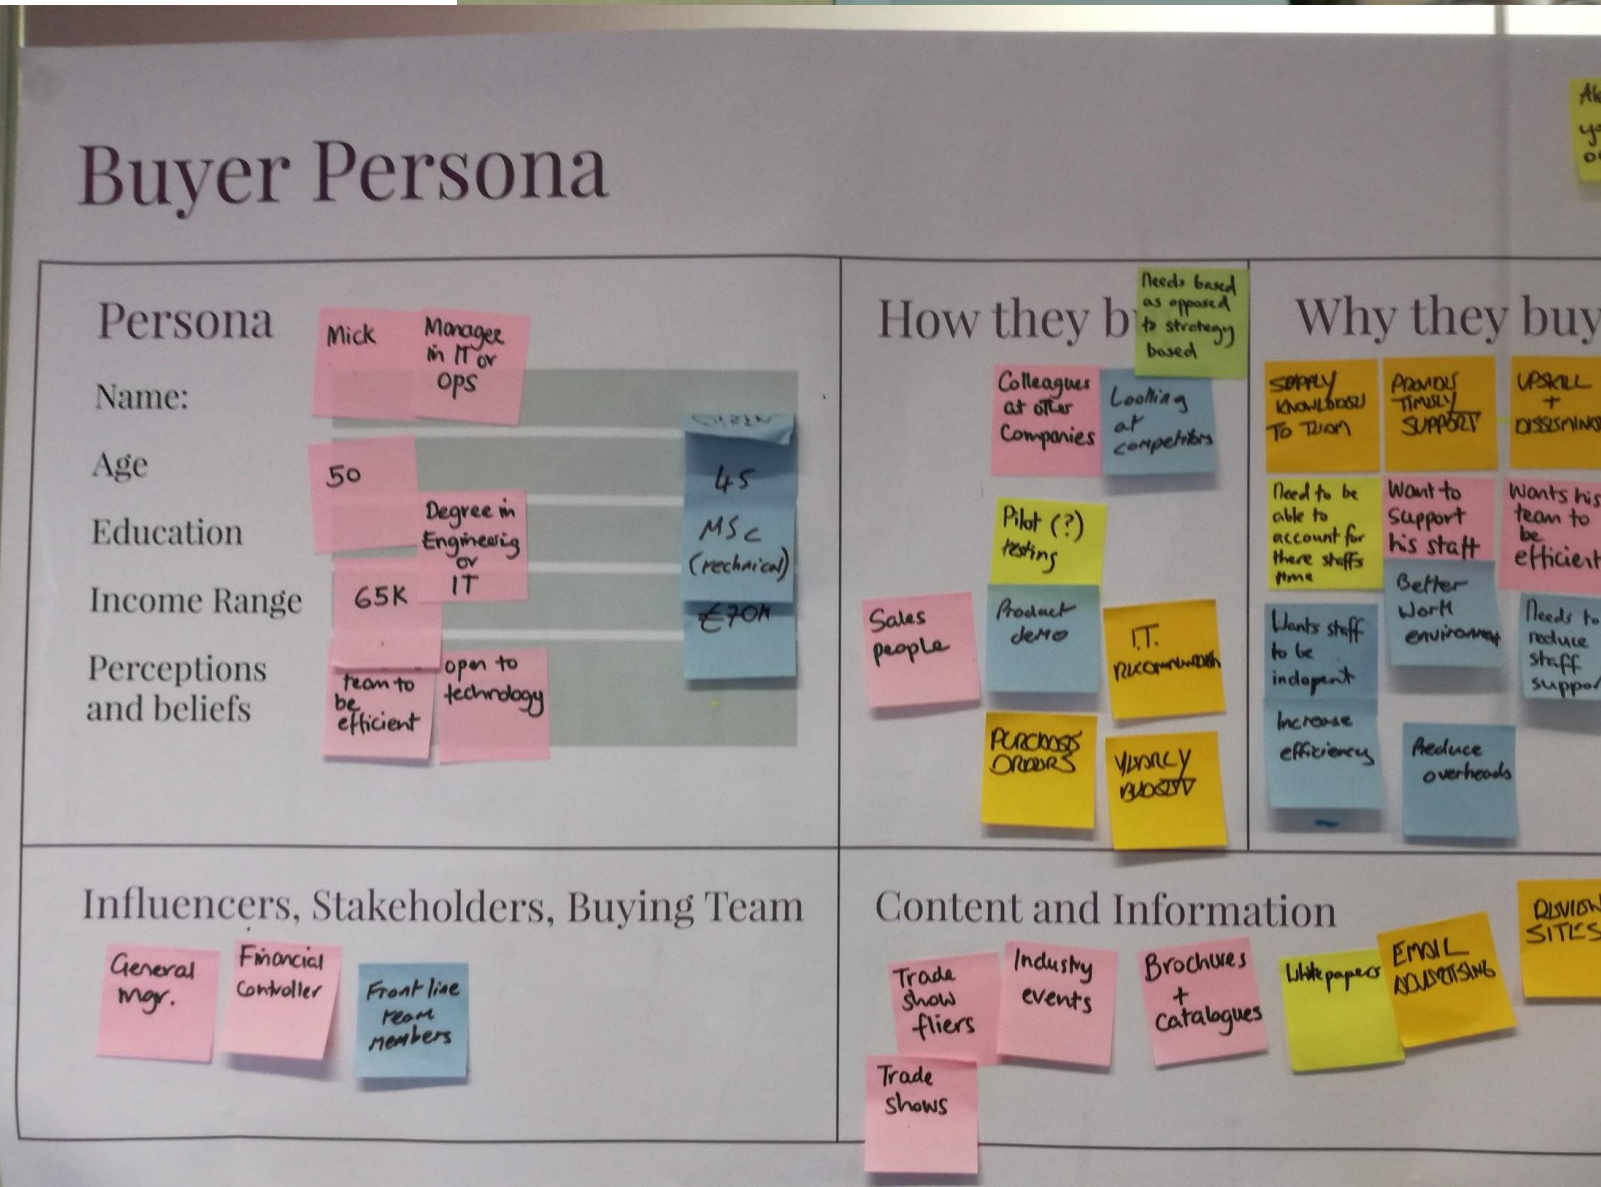

Perceptions/Beliefs

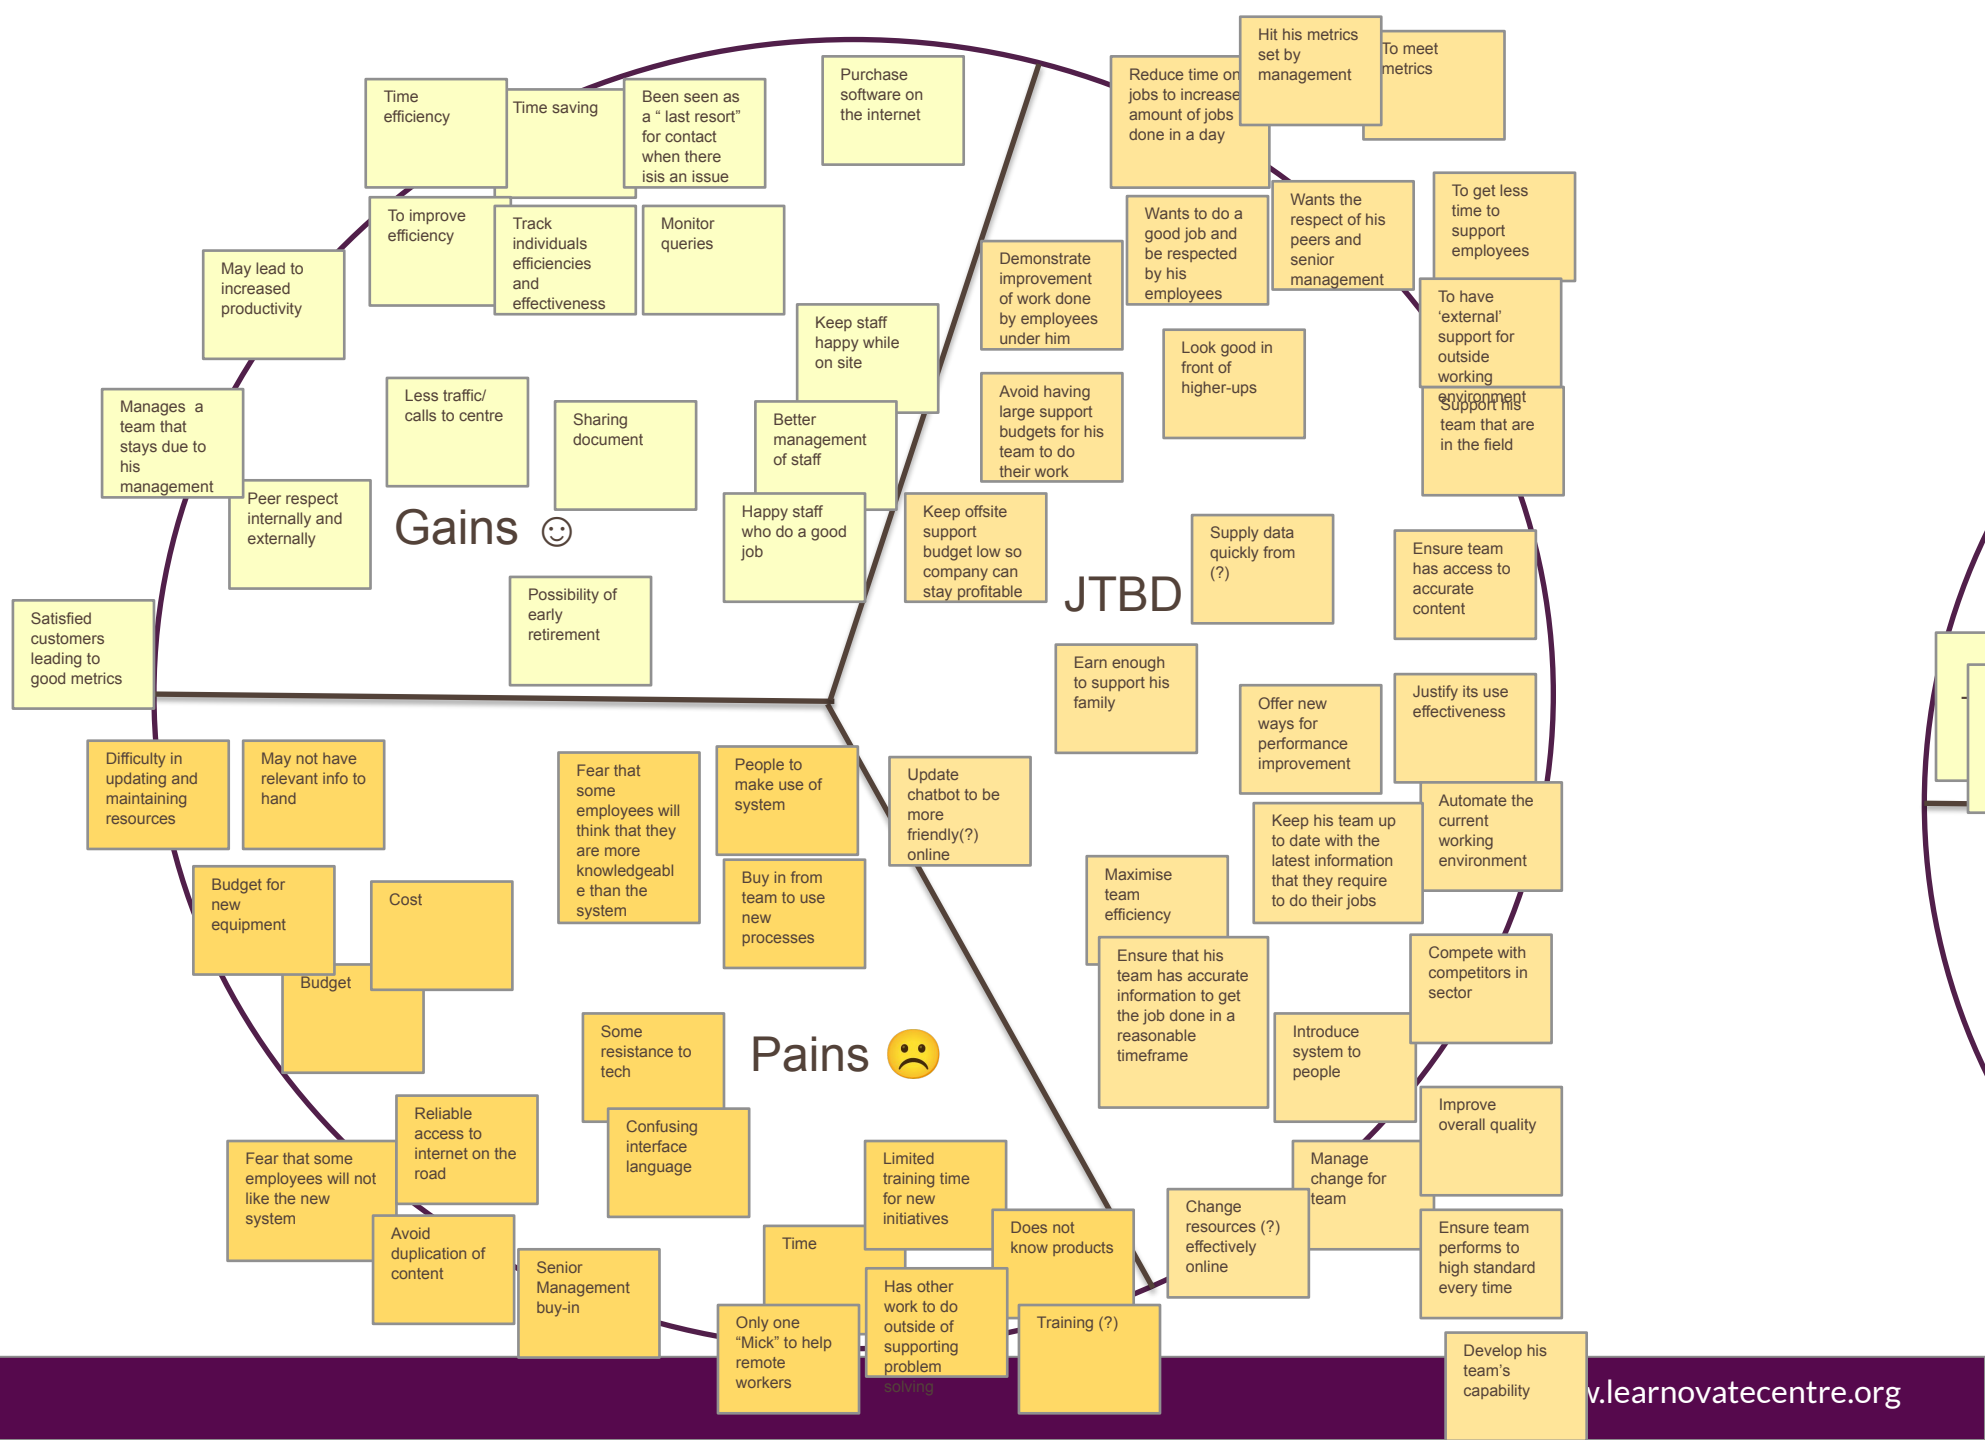

- Open to technology
- Wants team to be efficient

Age: 50

Education: Degree in Engineering or IT

Salary: €65K

Job

Reduce time on jobs to increase amount of jobs done in a day

Hit his metrics set by management

To meet metrics

Wants to do a good job and be respected by his employees

Wants the respect of his peers and senior management

Look good in front of higher-ups

To have 'external' support for outside working environment

Support his team that are in the field

To get less time to support employees

Maximise team efficiency

Ensure that his team has accurate information to get the job done in a reasonable timeframe

Ensure team has access to accurate content

Automate the current working environment

Manage change for team

Keep his team up to date with the latest information that they require to do their jobs

Improve overall quality

Ensure team performs to high standard every time

Avoid having large support budgets for his team to do their work

Demonstrate improvement of work done by employees under him

Keep offsite support budget low so company can stay profitable

Offer new ways for performance improvement

Less important

Change resources (?) effectively online

Compete with competitors in sector

Develop his team's capability

Earn enough to support his family

Pains (Barriers)

Fear that some employees will think that they are more knowledgeable than the system

People to make use of system

Fear that some employees will not like the new system

Buy in from team to use new processes

Some resistance to tech

Budget

Cost

Budget for new equipment

Senior Management buy-in

Limited training time for new initiatives

Does not know products

Time

Has other work to do outside of supporting problem solving

Only one "Mick" to help remote workers

Reliable access to internet on the road

Difficulty in updating and maintaining resources

May not have relevant info to hand

Avoid duplication of content

Confusing interface language

Gains (Outcomes)

May lead to increased productivity

Time efficiency

Time saving

To improve efficiency

Track individuals efficiencies and effectiveness

Monitor queries

Better management of staff

Been seen as a "last resort" for contact when there is an issue

Peer respect internally and externally

Manages a team that stays due to his management

Happy staff who do a good job

Keep staff happy while on site

Satisfied customers leading to good metrics

Less traffic/calls to centre

Not Essential

Possibility of early retirement

Nice to have
